DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Franz et al. The preamble of claims 1-3 merely relates to intended use and is given no weight in an apparatus claim. See Figure 1 of Franz et al. Nozzle pole piece 30 of Figure 1 of Franz et al. is read as a “nozzle portion”. Lower housing 14 of Figure 1 of Franz et al., exclusive of nozzle pole piece 30, is read as a “valve body”. The horizontal portions of the supply and outlet passages above the vertical supply passage 36 and above the vertical outlet passage 40 are read as “a fluid supply passage and a fluid outlet passage substantially arranged in-line”. In the disclosure in Figure 1 of applicants' specification, only a portion of the valve body 10 is shown. As indicated by the broken edge shown at the left end and the right end of Figure 1 herein, the valve body 10 herein extends beyond the portions of the valve body 10 shown. There is nothing in the disclosure herein to preclude passages 11 and 14 herein from extending vertically, or in any other direction in the area beyond that shown in the view of Figure 1 herein. In the same manner, the horizontal portion of the supply and outlet passages of Franz et al., exclusive of the vertical portions, may be read as the recited fluid supply and fluid outlet passage. The horizontal passage in nozzle pole piece 30 of Figure 1 of Franz et al. is read as a “orifice port”. The vertical passage in nozzle pole piece 30 of Figure 1 of

Art Unit: 3753

Franz et al. is read as a "through passage". The un-numbered venting port for nozzle 32 of Figure 1 of Franz et al. is read as a "drain port".

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
